FOR IMMEDIATE RELEASE

PHOENIX Process Equipment Launches NEW Website

LOUISVILLE, KY (July 10, 2018) -- PHOENIX Process Equipment, a leading provider of equipment for dewatering, classification, thickening, water clarification, and water recycling, launches its newly designed website <https://www.dewater.com>. The goal of the new website design is to create a seamless online experience for customers and business partners.

The new website has been completely redesigned, from improved navigation and functionality, to more in-depth content regarding [process technologies](#) and [product](#) offerings. It's also built using a responsive layout for compatibility across all web browsers and is mobile-friendly.

PHOENIX's new website will be regularly updated with information on company products, technologies, and events such as industry trade shows where PHOENIX will exhibit its products.

Visitors are encouraged to explore the new website and send any comments or questions to PHOENIX through the [Contact](#) page.

###

About PHOENIX Process Equipment Co.

PHOENIX Process Equipment Co., headquartered in Louisville, Kentucky, was established in 1984. The success of its dewatering technologies forged the foundation that has led the company to become an international leader in liquid-solid separation and residual thickening and dewatering technologies. Through internal development and strategic partnerships, PHOENIX has established a broad base of equipment offered through its world-wide network of sales representatives.
